MultiStream satellite receiver box satellite iptv
Octagon SX8 One satellite receiver
Mini satellite HD receiver with WiFi MultiStream IPTV

With the Octagon SX8 HD you get an extremely low, small and at the same time powerful Full HD digital satellite receiver, which is ideal for storage in niches (eg behind a TV). To do this, measure the longest side of the Octagon SX8 HD once only by 11.3 centimeters and there is also a corresponding suspension, as well as a four-digit IR display on. The receiver can be hidden while you still have full control over the selected channels, etc. Thanks to a separate small display. Pre-programmed for ASTRA 19.2 ° E & Turksat 42 ° E
